

Your Electronic Patient Record & the Sharing of Information

Please read this leaflet carefully. It will give you information about the sharing of your electronic patient record and the choices you need to make.

Today, electronic records are kept in all the places where you receive healthcare. These NHS Care Services can usually only share information from your records by letter email, fax or phone. At times, this can slow down your treatment and mean information is hard to access.

Greystones Medical Centre uses a system called SystmOne that allows the sharing of full electronic records across different NHS Care Services. We are telling you about this as a patient at this practice as you have a choice to make about how your practice shares information about your care from your electronic patient record. This form is not about your Summary Care Record (SCR), it is asking your sharing preferences regarding your full electronic GP record. You can choose to share or not to share your electronic GP record with other NHS Care Services.

How is my decision recorded?

Your GPs computer system has two settings to allow you to control how your medical information is shared:

SHARING OUT – I consent to my full GP electronic patient record being shared with other NHS Care Services where I am treated.

Please tick: Sharing Out (shared) Yes [ ] or No (not shared) [ ]

SHARING IN – I consent to this practice viewing information I've agreed to share at other NHS Care Services.

Please tick: Sharing In (viewable) Yes [ ] or No (not viewable) [ ]

TEXT MESSAGES
[ ] I consent to Greystones Medical Centre sending me text messages
[ ] I do not consent to Greystones Medical Centre sending me text messages
